# OUTDOOR THERMAL INSULATION FILM

Innotint® High performance architectural glass window film      Outdoor thermal insulation film

InnoTint® window film is a polymer PET polycool film, using advanced nanotechnology, can reflect most of the sun's heat and ultraviolet rays, preventing them from entering the room, so as to achieve the function of heat insulation and sunscreen, reduce cooling energy consumption, reduce carbon emissions.

InnoTint® outdoor heat-insulating film has various types such as double-sided silver, double-sided gray, natural color, etc., with one-way perspective function to meet the needs of users for multi-scene and multi-lighting degree, widely used in ordinary glass, tempered glass, insulating glass, lowe glass and other smooth glass surfaces. Heat insulation and energy saving, improve the appearance of glass, beautify the building, etc., high cost-effective, is the factory glass, building glass, curtain wall glass, etc., heat insulation and sun protection, improve the appearance of the ideal choice.

## Performance Data >>

Product	Model number	Visible light T%	Visible reflectance		Uv blocking rate	IR blocking rate	Total sunlight rejection	Shading Coefficient	Thickne ss
			indoor	outdoor					
Private Silver S20X 外贴私密银	S20X	14%	58%	63%	99.9%	88%	82%	0.21	3mil
Crystal Grey S20GYX 外贴水晶灰	S20GYX	18%	18%	16%	99.9%	83%	76%	0.28	3mil
Sky Blue C50X 外贴天光蓝	C50X	55%	9%	9%	99.9%	96%	51%	0.42	2mil
Sky Blue C70X 外贴天色蓝	C70X	75%	9%	9%	99.9%	92%	49%	0.6	2mil

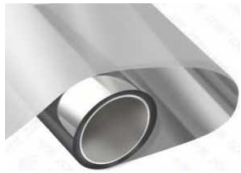

- Blocks more than 99% of UV rays, reducing fading and damage caused by UV rays
- Excellent thermal insulation based on nanotechnology saves costs associated with cooling buildings
- Excellent glare control allows for greater comfort and reduced carbon emissions
- The warm neutral interior with low reflectivity maintains a warm interior atmosphere and excellent views
- The bold, trendy exterior refreshes the building and provides excellent daytime privacy

# OUTDOOR THERMAL INSULATION FILM

## Application

Shopping malls, hospitals, shopping centers sales department skylight glass, Office glass, Home glass....

**S20X**  
Private silver on the outside  
外贴私密银

Transmittance index  
★★★★★  
Heat reflection index  
★★★★★  
Privacy index  
★★★★★

Silver inside and blue outside, vacuum aluminum plating, sun protection and cooling is very good.

**S20GYX**  
It is covered with crystal grey  
外贴水晶灰

Transmittance index  
★★★★★  
Heat reflection index  
★★★★★  
Privacy index  
★★★★★  
★★★★★

Dark gray, good privacy, good insulation performance, good building appearance improvement effect.

**C50X**  
Outside with sky blue  
外贴天光蓝

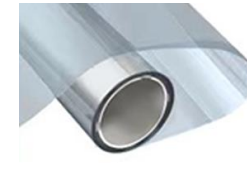

Transmittance index  
★★★★★  
Heat reflection index  
★★★★★  
Privacy index  
★★★★★  
★★★★★

Natural color, nano ceramic process, sunscreen cooling performance is very excellent.

**C70X**  
Heat reflection index  
外贴天色蓝

Transmittance index  
★★★★★  
Heat reflection index  
★★★★★  
Privacy index  
★★★★★  
★★★★★

Natural color, nano ceramic process, sunscreen cooling performance is very excellent.

## Product Comparison >>

\* This figure has been simulated and is not an actual product comparison.

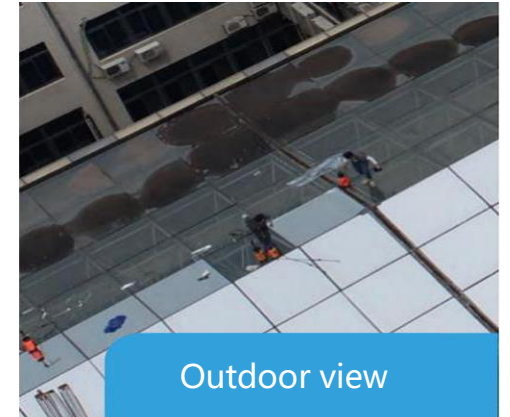

## Real case application >>

### Private Silver S20X

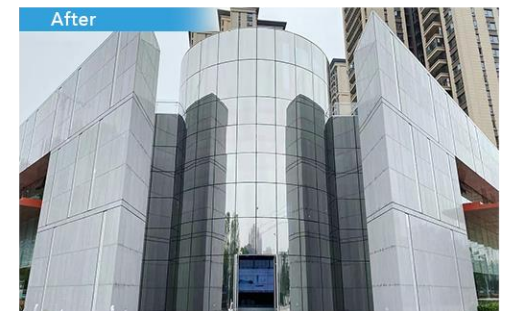

Heat insulation, sun protection, high-definition perspective, non-destructive vision

Beautify the ugly and unify the architectural appearance

S20GYX Thermal insulation + beautifying appearance

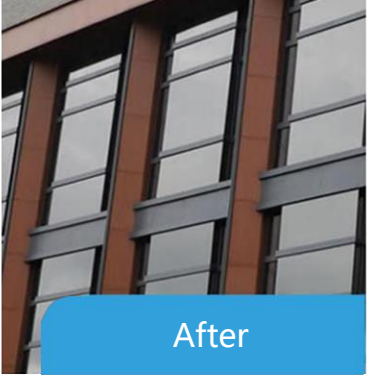

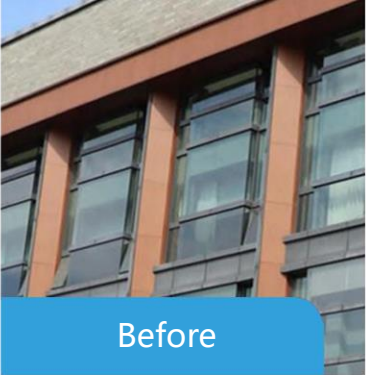

# OUTDOOR THERMAL INSULATION FILM

Real case applications >>

## Crystal Grey S20GYX

Thermal insulation and beautifying appearance!

## Skyblue C50X/C70X

Sky blue series, high transparent, good heat insulation performance, let the building natural and beautiful!
